***Response to Amendment***

1. Applicant's amendment and remarks of November 15, 2005 is acknowledged and entered.
2. Applicant's cancellation of claims 1, 2, 4, and 5 is acknowledged.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lawson et al. in view of Hopfensperger et al.

Lawson et al. disclose a pump operated spray assembly comprising a housing defining an outlet opening, a water reservoir in the housing, a tube leading from the reservoir to the outlet opening, a peristaltic pump for pumping water in the tube through the outlet opening, and a trigger operated circuit for activating a power supply to control the motor assembly to squirt water out of the outlet opening. Hopfensperger et al. teaches a peristaltic pump comprising a pump wheel 23 having a plurality of peripherally disposed freely rotatable rollers connected thereto and positioned to engage a tube 21, a motor assembly including a motor and a gear drive including an output shaft 26 for rotating the pump wheel as recited. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used in the device of Lawson et al. a peristaltic pump having the limitations as taught by Hopfensperger et al. since

Art Unit: 3752

Hopfensperger et al. teaches that peristaltic pumps having such limitations are known in the art.

***Allowable Subject Matter***

5. Claims 9, 3, and 6-8 are allowed.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Kuhl et al., Krebs et al., and Faeser et al. are pertinent to Applicant's invention.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
